

## **SAFE FACILITIES**

Westlake Charter School will be housed in a facility that meets California Building Code requirements (Part 2 (commencing with Section 101) of Title 24 of the California Code of Regulations), as adopted and enforced by the local building enforcement agency with jurisdiction over the area in which the Charter School is located.

As the Charter School is housed in District facilities, it will work cooperatively with the District to ensure that surveys and management plans are maintained and updated for all hazardous building materials (lead, asbestos, etc.) and all hazardous materials used and stored in and around the school are handled and dispensed properly. Additionally, appropriate training for staff working with hazardous materials (i.e., pesticides, cleaning chemicals, etc.) will be provided.

Inspections will be performed to ensure that daily operations do not compromise facility safety and health in any manner. This will include maintaining safe access / egress paths (both routine and emergency), access to emergency equipment, eliminating obstructions to airflow, etc.
