

Hello,

We would like to thank you for bringing this safety issue to our attention. Per NASA and AAS safety guidelines found here: <https://eclipse2017.nasa.gov/safety> and here: <https://eclipse.aas.org/eye-safety/iso-certification>, the glasses purchased on August 2, 2017 do not meet the safety guidelines and do not appear to be legitimate.

Your safety is our concern. We ask that you do not use these Eclipse Glasses and that you promptly dispose of them.

Best regards,
Ashley B
